The Seawater Intrusion Working Group advises SVBGSA staff and is not a Board appointed Committee. Meetings are not subject to the Brown Act open meeting laws but are published for the public that may wish to attend and remain informed on the Committee's work.

As a reminder

The Seawater Intrusion Working Group (SWIG) was established by SVBGSA staff as the first step in implementing the Groundwater Sustainability Plan for the 180/400 foot aquifer. The SWIG is designed to pull together the best available science, data, and understanding of local seawater intrusion causes and potential resolutions to develop an agreed-to approach for managing seawater intrusion. SWIG advises SVBGSA staff and is not a legislative body subject to the Brown Act open meeting law. However, meetings are publicly posted at svbgsa.org/meetings for the benefit of the community that wishes to attend and remain informed of SWIG's progress.

1. Welcome - Roll Call

2. **Update on Deep Aquifer Study**
3. **Update on Demand Management Strategies**
